3 Gallon Aquarium Kit

AQ360-34c

Children under the age of 13 should be supervised by an adult with the setup, maintenance and fish care

1. Your New Aquarium

People of all ages enjoy looking at aquariums. Aside from the belief that an aquarium is beautiful, many also believe having an aquarium can be relaxing, rewarding and a great conversation piece all at the same time. You will have many enjoyable hours with your new aquarium and fish.

Included in your new Aquarium Kit

1. 3 gallon tank
2. Full hood
3. LED light
4. Undergravel filter
5. Air pump
6. Airline tubing

2. Important Safety Instructions

- Please read Safety Instructions section before operating this unit. Completely set up the 3 gallon aquarium kit before plugging filter and light into electrical outlet.
- Add a drip loop in all electrical cords. Use of a GFCI rated outlet or circuit is recommended.

Make sure your tank has not been damaged during shipping before you start the setup process.

3. Tank Placement

- Place the aquarium on a level, strong surface that is able to support the weight of the assembled aquarium and cannot be damaged by water.
- The aquarium should be located near an electrical outlet to provide power for the light and filter. Use of a GFCI rated outlet or circuit is recommended.
- Never place an aquarium on top of a TV or other electrical components.

4. Filter Set Up

- Assemble the Undergravel System inserting the Riser Tube into the X-shaped plate.
- Connect one end of the air-line tubing to the Air Pump, connecting the opposite end to the airstone.

- Slide the airstone to the bottom of the Riser Tube.
- Be sure to form a drip loop in the air-line tubing to prevent back draining in case of electrical loss.

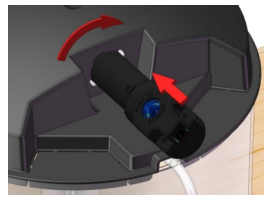
5. Adding Gravel

- Rinse materials in running water – aquarium, gravel, stones, plastic plants and other decorations, etc.
- Place gravel, rocks and decorations in the tank now, spreading the gravel evenly across the bottom of the aquarium.

Gravel and Decorations are not included with this aquarium kit.

6. LED Light Set Up

- Place the Hood on top of the tank and make sure it is fully seated.



- Insert LED light unit into back of hood, turning to the right and tighten snuggly to secure it. Insert power adaptor plug into the LED light unit.
- Plug power adaptor into standard 110 volt wall socket. Use of a GFCI (Ground Fault Circuit Interrupter) is always recommended when using electrical appliances around water.

7. Filling Tank

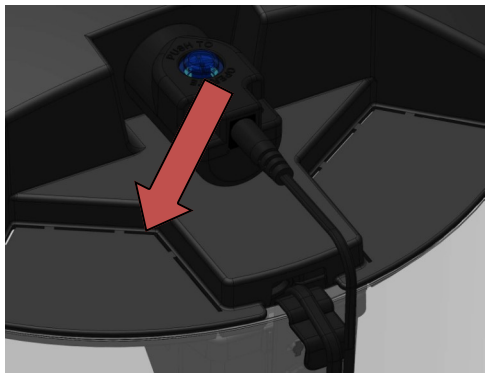
- Fill the aquarium with water to within one inch of the top of the tank. Do not overfill since spillage may occur.
- Add a tap water conditioner such as Stress Coat by API to remove chlorine and other harmful chemicals found in tap water.
- If you are adding fish right away, it is recommended to use Quick Start by API, immediately starts the natural aquarium cycle allowing for instant addition of fish.

8. Operating LED Light

- You can turn on/off the LED light by pushing the blue button switch on top of the hood.
- To select a specific light color, continue to press the blue button until desired color is located.

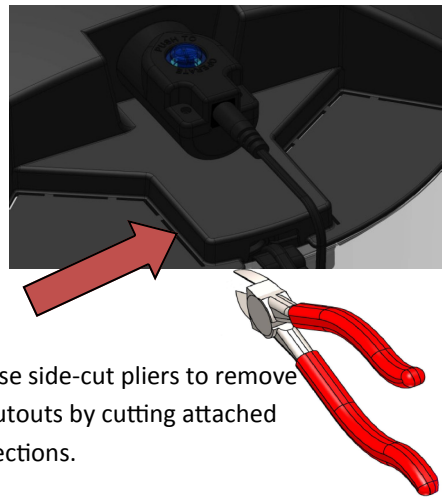
9. Adding Optional Heater

- Optional) If you are adding a heater (heater not included) remove the section shown below by using side cutting pliers and cutting the attached webbing.
- Read and follow the heater's instructions.
- Check with your retailer for recommended heater settings.
- Adjust heater settings as directed.



10. Adding Additional Accessories

- You can add additional accessories by removing one of the two sections shown below.



Use side-cut pliers to remove cutouts by cutting attached sections.

11. Selecting Fish

Patience is important when establishing your new aquarium. Begin by talking to an aquatic professional at your local aquarium store about which fish are best suited for your aquarium and are compatible with each other, and how many would be appropriate for your aquarium. Inform them that you have just set up a new aquarium so they can recommend hardy fish. Be sure that the fish are eating and acting normally. Check for ragged fins that can be caused by harmful bacteria or white spots caused by parasites. Always choose healthy looking fish.

Do not add too many fish at once. Choose a couple and then wait for two weeks before adding more. Do not overcrowd.

12. Shopping List

API STRESS COAT®
Makes tap water safe

QUICK START®
Immediately starts the natural aquarium cycle allowing for instant addition of fish

API STRESS ZYME®
Keeps the aquarium clean

API 5 in 1 AQUARIUM TEST STRIPS
Measures water parameters
